

CENACLE

Construction of a
seniority residence.

The project consists of a new concept of luxury private apartments with services for seniors.

The Cenacle has 90 individual apartments of 90m², ultra-comfortable, perfectly adjusted heating and lighting, suitable basic furniture.

The residence combines elegance with the desired security requirements and the flexibility of a living environment where everyone can relax. The imperatives of functionality, quality, safety and light have been associated with the virtues of wood and bluestone. The housing includes 14.000m² built in a park of two and a half hectares of nature, tranquility in La Hulpe.

Rue Pierre Broodcoorens, 46
à 1310 La Hulpe

The complex perfectly reflects the requirements of sustainable development : low energy, green roof, rainwater recycling, double flow ventilation per apartment.... The brightness offered to all floors by many terraces, large windows covered with wooden shutters, gives the place a special appeal.
