

## SOLARIS “MIPIM GREEN AWARD 2010”

### Construction of an office building

Having received the Eco-Building Award 2009 and the MIPIM Award 2010 in recognition of its environmental qualities, Solaris is the first [Valideo-certified](#) building (analysis according to a global approach on four themes, i.e. site, management, comfort and social value) with a score of 78%. The building is equipped with a solar photovoltaic façade and a geothermal heat pump.

Designed by the architectural office Assar, Solaris provides 13,700 m<sup>2</sup> of office space spread over eight levels. Two atria rise up over three floors and let in a great deal of natural light.

Chaussée de La Hulpe, 120 -  
1000 Brussels
